Dear Dr. Henny,

I am writing to ask you to urge the Food and Drug Administration to allow non-dairy beverages be labeled as "milk" and the milk from cows to be labeled as "cows' milk". The dairy industry should not be allowed to maintain its monopoly on the use of the word milk and should be required to include the word cow on its label just as the word soy is used on the label for soy milk.

Thank you for your attention to and consideration of these labeling concerns.

Sincerely,

Jennifer Doob
